

Features

- ✓ Clients database, both for private as well as business clients.
- ✓ Dossiers: per client you keep all information regarding a reservation in a dossier.
- ✓ Print or mail invoices and handle payments.
- ✓ Tasks can be added to dossiers, groups, as well as required services.
- ✓ Suppliers database, which allows you to keep all products and their prices organised per supplier (including your own products)
- ✓ Products, both delivered by suppliers as well as packages made by yourself.
- ✓ Groups and passengerlists.
- ✓ Management information: financial data, booking statistics.
- ✓ Preferences and permissions, e.g. allowing your administrator to limit certain functions to certain users and departments. And many other ways to 'personalize' your own system.
- ✓ Online Help and Support facilities.
- ✓ A networked business application without extra costs for software or a server.
- ✓ Access to your business from anywhere, anytime.
- ✓ Storage of all data in a highly secure server location.

And much more...

Online Demonstration

If you're interested to have more information about Jambix, we can give an online demonstration on how you could use Jambix and how it could be useful to running your business.

This demonstration is given using Skype for conversation and an application which allows you to see the demonstrators' screen. During this demo we show you how Jambix is organised, its functionalities and we discuss Jambix as a solution to managing your bookings.

What our clients say

"It looks and works great."

"I'm quite sure that Jambix is the right choice for us."

"We work completely with Jambix and it is super."

"Well done on providing us with such a great tool to manage our work."

Jambix® is a registered trademark of Intakt BV, Netherlands.

JAMBIX is a web-based multilingual Travel Management System specifically developed for tour operators, direct sellers, and travel agencies. It is a flexible application that offers a wide range of functionalities, such as managing reservations, groups, products, and invoicing, while providing financial in-sight in sales through comprehensive reporting.

Developed by Intakt BV Amsterdam, Jambix boasts a world-wide customer base that relies on it to manage their businesses. Offering unbeatable customer service and support, more than 15 years of travel industry experience, and a low-cost alternative to its competitors, Jambix promises to become a market leader in the travel industry.

Strong points

- **Web-based Application** Can be accessed 24/7 from any computer with an internet connection. You can log on to our secured server and work from home, from your offices, or on the road. No need to download special software; Jambix runs with Firefox or Internet Explorer.
- **User Friendly Interface** Easy to use since it is built using modern AJAX technology (also used by Google Docs), making it a simple User Interface that is very intuitive so that even non-technical users will want to use.
- **Centralized Database** Eliminates data redundancy and ensures that all team members are working with the same data. Client information can be reused time and time again. Supplier details and the product they provide are easily added to booking and invoices. Our searching capabilities ensure that you find the data you need - fast.
- **Secure Server** No server needed; we manage all hardware and provide daily back-ups, saving you risk and money. Use Jambix without fear that IT costs will be a burden to your company.
- **Flexible** A very flexible application that can be customized to suit your business needs and can handle different types of business.
- **Manageable** Keep all information regarding a reservation in a single dossier (file) that links to bookings, invoices and payments. Products and allotments for both suppliers and your company are easily entered, copied, and repeated. Groups and passenger lists share common information for quick access and no data loss. Financial data and booking statistics are automatically tracked throughout the system keeping you informed of the status of your business.

- **Reports** Need a list of unpaid invoices, active dossiers, or the status of your multiple groups? Jambix comes with a set of standard reports that you can run at any time. Need a report we don't have? We will customize extra reports for you.
- **Built In Communication & Documentation** Custom-made templates make communication with clients and suppliers easier than ever before with various types of correspondence available (letters, e-mails, fax). Travel documentation can also be customized by using different templates for reservations, vouchers, invoicing, etc.
- **Multi-Language** Available in English, Dutch, French, Swedish and Spanish with additional languages planned.
- **Sophisticated Administration** Enables you to define your company preferences and permissions, limit user access and functionalities, set up flexible template system for both standard as well as custom-made output (invoices, vouchers, reports, etc).
- **Unbeatable Support** Accessible online, by Skype, phone, or e-mail, the Jambix team is available and eager to help. Easy to use online help, Administrator Manual, and a User Guide are also provided. Onsite training is available on request.

- **Back-ups and Security** Jambix is built with safety and security in mind. Following are a number of measures taken to provide in this:
 - Backups** of Jambix and all administrations in the system are made in regular intervals and in multiple ways:
 - Real-time synchronization of Jambix and entered data on an extra hard disk of the server (RAID)
 - Continuous synchronization of Jambix and entered data on a fallback server (with a 5 minutes delay)
 - Daily incremental back-up of Jambix and its databases on an external server
 - Secure Socket Layer (SSL)** is used for all communication between users and the system. This makes it very difficult for others to intercept data and therefore makes Jambix extra safe to use.
 - Logfiles** are kept of all changes made to your administration and which users made them.

Low costs

The prices of the Jambix services are based on a monthly fee plus a fee per passenger. The fee per passenger varies depending on the total number of passengers in a contract year. To start using Jambix there are set-up costs involved. See our website or contact us for an estimate.

Requirements

As Jambix is completely web-based, no server hardware or software are needed. A standard web-browser will suffice.

- Internet access.
- Browser compatibility: Internet Explorer or Firefox.
